

Our pay-off systems can make the unwinding of coils a lot easier.

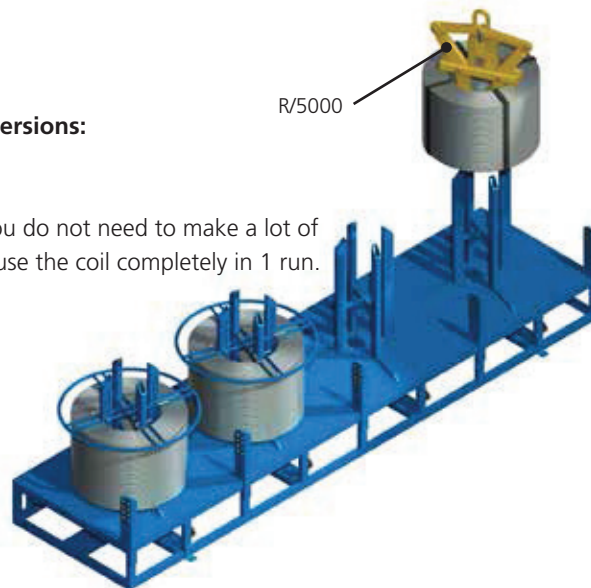

- The coil keeps its shape
- There is no damage to the wire
- The coil unwinds perfectly
- Pneumatically driven

The pay-off system is available in 2 versions:

### 1. With fixed cores - DSPR

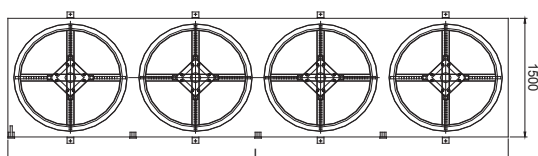

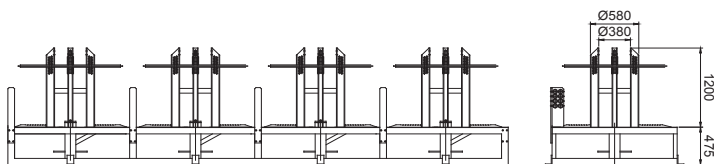

This system is particularly useful when you do not need to make a lot of changes in diameter, so it allows you to use the coil completely in 1 run.

Type	Number of coils
DS1PR	1
DS2PR	2
DS3PR	3
DS4PR	4

### Dimensions

Type	Length (mm)
DS1PR - DS1PRO	1500
DS2PR - DS2PRO	3000
DS3PR - DS3PRO	4500
DS4PR - DS4PRO	6000

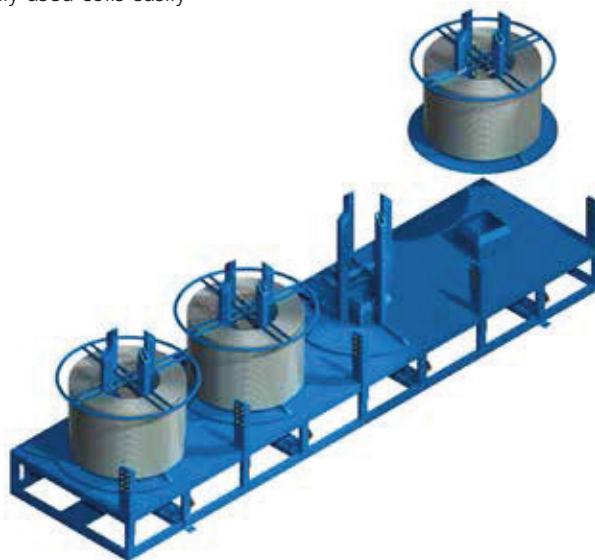

## 2. With reels - DSPRO

This system is useful when there are a lot of changes in diameter, taking into account that the coil is not finished yet. The reels allow you to change the partially used coils easily and set them aside for later use.

Type	Number of coils
DS1PRO	1
DS2PRO	2
DS3PRO	3
DS4PRO	4

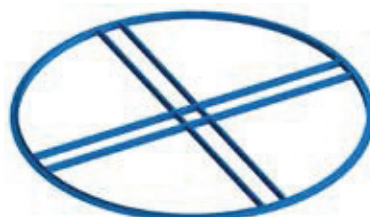

- Upon request, both systems can be combined (e.g. 3 fixed cores and 1 reel).
- Unwinding both to the left and right is possible.

### Individual components

Reel  
Type: DS OH

Washer  
Type: SR 1250
